Relation of the Directors to the Work and Publications of the NBER

1. The object of the NBER is to ascertain and present to the economics profession, and to the public more generally, important economic facts and their interpretation in a scientific manner without policy recommendations. The Board of Directors is charged with the responsibility of ensuring that the work of the NBER is carried on in strict conformity with this object.

2. The President shall establish an internal review process to ensure that book manuscripts proposed for publication DO NOT contain policy recommendations. This shall apply both to the proceedings of conferences and to manuscripts by a single author or by one or more co-authors but shall not apply to authors of comments at NBER conferences who are not NBER affiliates.

3. No book manuscript reporting research shall be published by the NBER until the President has sent to each member of the Board a notice that a manuscript is recommended for publication and that in the President's opinion it is suitable for publication in accordance with the above principles of the NBER. Such notification will include a table of contents and an abstract or summary of the manuscript's content, a list of contributors if applicable, and a response form for use by Directors who desire a copy of the manuscript for review. Each manuscript shall contain a summary drawing attention to the nature and treatment of the problem studied and the main conclusions reached.

4. No volume shall be published until forty-five days have elapsed from the above notification of intention to publish it. During this period a copy shall be sent to any Director requesting it, and if any Director objects to publication on the grounds that the manuscript contains policy recommendations, the objection will be presented to the author(s) or editor(s). In case of dispute, all members of the Board shall be notified, and the President shall appoint an ad hoc committee of the Board to decide the matter; thirty days additional shall be granted for this purpose.

5. The President shall present annually to the Board a report describing the internal manuscript review process, any objections made by Directors before publication or by anyone after publication, any disputes about such matters, and how they were handled.

6. Publications of the NBER issued for informational purposes concerning the work of the Bureau, or issued to inform the public of the activities at the Bureau, including but not limited to the NBER Digest and Reporter, shall be consistent with the object stated in paragraph 1. They shall contain a specific disclaimer noting that they have not passed through the review procedures required in this resolution. The Executive Committee of the Board is charged with the review of all such publications from time to time.

7. NBER working papers and manuscripts distributed on the Bureau's web site are not deemed to be publications for the purpose of this resolution, but they shall be consistent with the object stated in paragraph 1. Working papers shall contain a specific disclaimer noting that they have not passed through the review procedures required in this resolution. The NBER's web site shall contain a similar disclaimer. The President shall establish an internal review process to ensure that the working papers and the web site do not contain policy recommendations, and shall report annually to the Board on this process and any concerns raised in connection with it.

8. Unless otherwise determined by the Board or exempted by the terms of paragraphs 6 and 7, a copy of this resolution shall be printed in each NBER publication as described in paragraph 2 above.

Subject Index	717

Prefatory Note

This volume contains revised versions of the papers presented at the Conference on Research in Income and Wealth titled “Measuring and Understanding the Distribution and Intra/Inter-Generational Mobility of Income and Wealth,” held in Bethesda, Maryland, on March 5–6, 2020.

We gratefully acknowledge the financial support for this conference provided by the Stone Center on Socio-Economic Inequality at the CUNY Graduate Center, the Stone Wealth and Income Inequality Project at Brown University, Statistics of Income (SOI)/Internal Revenue Service (SOI), Opportunity Insights, and the NBER. Support for the general activities of the Conference on Research in Income and Wealth is provided by the following agencies: Bureau of Economic Analysis, Bureau of Labor Statistics, the Census Bureau, the Board of Governors of the Federal Reserve System, SOI/IRS, and Statistics Canada.

We thank Raj Chetty, John N. Friedman, Janet C. Gornick, Barry Johnson, and Arthur Kennickell, who served as conference organizers and as editors of the volume.

Executive Committee, November 2020

John C. Haltiwanger	William Wascher
Ron S. Jarmin	

Acknowledgments

The conference organizers thank those who contributed to making the conference successful, especially Brett Maranjian and the other staff members at the National Bureau of Economic Research (NBER) conference department. The authors of the chapters, the discussants, and the inquisitive audience played the most essential role. Discussants for the conference sessions were Pirmin Fessler, William Gale, David Johnson, Maggie R. Jones, Bruce D. Meyer, Frédérique Savingnac, and Alexander Yuskavage. Katharine Abraham, director of the Conference on Research in Income and Wealth (CRIW), provided helpful guidance. The organizers are also grateful to Helena Fitz-Patrick at NBER and to the staff at the University of Chicago Press (UCP) for guiding the volume through the publication process, and to anonymous referees from the NBER and the UCP.

The conference would not have been possible without generous financial support from the Stone Center on Socio-Economic Inequality at the CUNY Graduate Center, the Stone Wealth and Income Inequality Project at Brown University, Statistics of Income/Internal Revenue Service, Opportunity Insights, and the NBER.

The conference was part of a commemoration of the 100th anniversary of the NBER. The CRIW was launched as an NBER initiative in 1935. NBER president and CEO James Poterba delivered at lunchtime talk at the conference, explaining how income distribution and the share of national income received by labor and capital were among the key issues that led to the founding of the NBER.
