LIST OF TABLES AND NOTES

The roman numeral in the table number indicates the Part of the volume in which the table appears. The tables numbered by a roman numeral and a lower case letter are summary text tables used in the Prefaces to facilitate discussion. The tables numbered by roman and arabic numerals are basic tables; they follow the Preface of each Part and contain the detailed data. The notes that follow most of the basic tables provide descriptions of procedures used and some subsidiary data; they are identified by capital letters and the number of the basic table to which they are appended.
