^aThe saving originating in mutual financial organizations (even if actually transferred to households) was treated in an analogous way to corporate saving, so as to avoid double counting of the saving flow (once as saving of households and once as saving of mutual financial organizations).

^bThe saving originating in unincorporated business and in operations of brokers and dealers was treated in an analogous way to corporate saving, so as to avoid double counting of the saving flow.

^a \$5 million or under.

^b The retained surplus originating in government monetary agencies was recorded as surplus retained in these agencies—the exchange equalization fund, and production credit associations—although they were transferred to the government budget. This was done to avoid double counting of retained surplus (net saving): once as saving of the federal government and once as saving of the above-mentioned organizations.
