

This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Empirical Foundations of Household Taxation

Volume Author/Editor: Martin Feldstein and James Poterba, editors

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-24097-5

Volume URL: <http://www.nber.org/books/feld96-1>

Conference Date: January 20-21, 1996

Publication Date: January 1996

Chapter Title: List of Contributors, Indexes

Chapter Author: Martin Feldstein, James M. Poterba

Chapter URL: <http://www.nber.org/chapters/c6243>

Chapter pages in book: (p. 279 - 290)

Contributors

James Alm

This Page Intentionally Left Blank

Subject Index

- Ability to pay: criterion to measure progressivity, 106; effective subsidy rates by, 120–23; potential income as measure of, 120–23
- Accelerated cost recovery system (ACRS), pre-TRA86, 200
- Adjusted gross income (AGI): as basis for child care credit rate, 109–14; definition changes, 172–74, 190; effect of secondary earner deduction on, 60n30, 64–66; Feenberg-Poterba time series on capital gains and, 174; marriage bonus and penalty by, 59–60, 64–66; as minimum threshold for medical deductibility, 135–36; shares received by top income earners (1984–90), 173–74
- Adverse selection: devices to deal with, 166–67; as health insurance problem, 166
- At-risk rules, U.S. tax code, 216–20
- Audit likelihood: joint-agency audit model, 250–53; single tax authority, 244–45
- Audit model: estimation results, 261–69; joint-agency model, 245–53, 271–72; by single tax authority, 239–45; state and federal tax audit decisions, 237–39
- Audit programs: federal-level, 236; survey of state-level, 236–37
- Audit selection: single tax authority, 243–44; strategic decision tree, 271–72
- Bracket creep, 11
- Capital gains: based on consistent definitions of income, 174; effect of repeal of General Utilities doctrine, 17n3, 184; eliminated exclusion in AGI definition, 173; Feenberg-Poterba time series on AGI and, 174; percent exclusion in AGI definition, 173; rationale for tax reform, 1
- Cattle feeding, 198–200
- C-corporations: shift in activity from, 183–85; under TRA86, 177n3
- CCTC. *See* Child care tax credit (CCTC)
- CES. *See* Constant elasticity of substitution (CES)
- CEX. *See* Consumer Expenditure Survey (CEX)
- Child care expense, current treatment, 101
- Child care tax credit (CCTC): benefits and determinants of benefits, 100, 111–20; compared to dependent care assistance plans, 101–2; by income level (1989), 112–14; nonrefundability, 114–15; progressive features of, 105; for tax relief (1989), 107–11; tax savings comparisons with dependent care assistance plans, 129–32; U.S. households taking, 99
- Compensation, cash alternative, 135
- Constant elasticity of substitution (CES), 82–86, 94–95
- Consumer Expenditure Survey (CEX), 83–86, 95
- Consumption: intertemporal elasticity of substitution, 82–86; maximization in two-

- Consumption (*continued*)
 period labor supply model, 78–82; of medical care with insurance, 135
- Consumption tax: advantages, 94; elements in current U.S. income tax, 97; simulations of welfare gains and losses, 89–92
- Current Population Survey (CPS), 171
- Data sources: analysis of ERTA effect on women's labor force participation, 13–15; for analysis of health insurance subsidies, 136; analysis of shift from income to consumption tax, 80; Consumer Expenditure Survey (CEX), 83–86; data samples for tax audit analysis, 253–61; for distributional effect of child care tax credit, 100, 106–7, 111; for estimates of federal and state audit programs, 238; Statistics of Income tax return data, 111; for TAXSIM analysis of tax reform effects on married women, 53–54
- DCAPs. *See* Dependent care assistance plans (DCAPs)
- Deadweight loss: with alternative assumption for secondary earner deduction, 65–67; alternative tax rule effects, 61–64; of income tax with marginal tax rate, 44–45; secondary earner flat tax rates, 67–69; of tax-induced changes in women's participation rate, 46–53
- Deductibility: of individual medical care purchases, 135–38; of interest rates under TRA86, 230–31
- Deduction, secondary earner: under ERTA, 6, 11; income tax law (1981–86), 59–60; in optimal tax theory, 67; repeal in TRA86, 59
- Dependent care assistance plans (DCAPs), 101; compared to child care tax credit, 101–2; for tax relief (1989), 107–11; tax savings comparisons with child care tax credit, 129–32
- Depreciation allowances: accelerated cost recovery system, 200–202; tax shelter, 197
- Difference-in-difference regression model: criticism of, 32–38; use of, 6, 12–13; women in pre- and post-ERTA periods, 13–16; women's labor force participation and hours of work, 20–25
- Earners, secondary: deduction (1981–86), 59–67; deduction for married women under ERTA, 6; deduction in optimal tax theory, 67; income tax law (1981–86), 59–60; optional flat tax rate, 67–69; repeal of deduction under TRA86, 59; when excluded from OASDHI tax base, 71
- Economic Recovery Tax Act (ERTA), 1981: change in labor supply of women under, 12; declining rate credit related to child care expense, 101; dependent care assistance plans, 101; investment tax credit under, 200; rationale for, 1; reduction of income tax rates, 5, 9–11, 30, 170
- Effective subsidy rate (ESR), 106, 108t, 110–11, 120–23
- Employees: benefits of dependent care assistance plans, 129; contributions to employer-provided health insurance, 139–40
- Enforcement programs: federal and state, 235–39; New York State, 274
- Equipment leasing, 200–206, 218–20
- ERTA. *See* Economic Recovery Tax Act (ERTA), 1981
- ESR. *See* Effective subsidy rate (ESR)
- Feenberg-Poterba time series on AGI, 174
- Feldstein-Samwick social security tax rate, 147, 151
- Flat rate tax schedules, secondary earner option, 67–69
- Haig-Simons definition of income, 102
- Harberger-Browning formula, 44
- Health insurance: effect of subsidy on terms of, 166; moral hazard and adverse selection issues, 166–68; price elasticity of demand for, 155; relative after-tax price, 141–42; tax subsidy, 137–38
- Health insurance, employer-provided: after-tax cost of, 138–42; after-tax price with different tax cap settings, 156–61; capping tax exemption for, 152–61; employee contributions to, 139; issues related to determinants of, 162; new estimates of tax subsidy, 148–52; reform proposals, 152; subsidies to, 135–38
- Hours of work: decisions related to child care, 104–5; difference-in-difference regression, 25–30; effect of tax relief for child care on, 123–26; married women with marginal tax rate reductions, 46–49; women in pre- and post-ERTA periods, 24–25. *See also* Consumption; Leisure

- Income: C- and S-corporation (1984–90), 177, 183–85; determinants of increases in high (1980s), 182–87; Haig-Simons definition of, 102; as measure of ability to pay, 103, 106; partnership, 177; from passive activities, 194; potential income as measure of ability to pay, 120–23; S-corporation individuals, 177. *See also* Adjusted gross income (AGI)
- Income, reported: of high-income taxpayers (1984–90), 182–84; increase of high-income families', 169–72, 182–84
- Income, taxable: conversion under tax shelter, 197; deduction of large medical costs, 140–41; effect of secondary earner deduction on, 59–67; exclusion of employer-supplied health care services, 167; exclusion of value of employer-provided health insurance from, 135–38
- Income inequality: causes of increase in, 189–90; Census Bureau data related to, 171; data used to measure, 171–72; literature related to, 171; nontax explanations, 184–87, 189–90; origins of, 171; trend analysis (1954–80, 1954–90), 178–82
- Income tax, personal: distortion under current tax law, 96–97; rate reduction under ERTA (1981), 5, 9–11; rate reduction under TRA86, 5
- Internal Revenue Service (IRS): at-risk rules in 1976 Code, 216–20; Information Returns Program, 236; Statistics of Income (SOI) data, 111, 171–72
- Investments, tax-sheltered: after TRA86, 210–16; mechanics of, 196–98; pre- and post-TRA86 cattle feeding, 198–200; pre- and post-TRA86 equipment leasing, 200–206; pre- and post-TRA86 real estate, 206–10; targeting of abusive pre- and post-TRA86, 216–20
- Investment tax credit (ITC), 195, 200–201
- IRA eligibility (under ERTA), 11
- Labor force participation: difference-in-difference regression, 25–30; incidence of married women, 39; married women with marginal tax rate reduction, 46, 49–51; women in pre- and post-ERTA periods, 20–25, 30, 33–34; women's labor supply elasticities, 40, 43–44, 49, 74
- Labor supply: decisions related to child care, 104–5; difference-in-difference regression, 25–30, 35–38; effect of tax relief for child care, 123–26; elasticities of men and women, 40; literature related to taxation and, 8–9; with simulations of consumer behavior, 82–89; two-period model of consumption and leisure maximization, 78–82. *See also* Labor force participation
- Labor supply model, 7–8
- Leisure: intertemporal elasticity of substitution, 82–86; maximization in two-period labor supply model, 78–82
- Marriage bonuses, 59–60, 62–63t, 65t
- Marriage penalties, 41, 59–60, 62–63t, 65t
- Marriage tax, 41
- Moral hazard: devices to moderate, 166; in health care insurance coverage, 165–66
- National Child Care Survey (NCCS), 100, 106–7, 111
- National Medical Care Expenditures Survey (NMCES), 1977, 148
- National Medical Expenditures Survey (NMES), 136, 143–46
- Noncompliance, tax, 235–36
- Panel Study of Income Dynamics (PSID), 171
- Partnerships: customers of equipment-leasing, 201; income, 177; increased attractiveness under TRA86, 185; limited partnerships as tax shelters, 197–98; as tax shelters, 193–94
- Passive losses: distribution of, 220–23; limitations by income level, 222–23
- Passive loss limitation rules: effect under TRA86, 185, 191–92, 194, 223–24; partnership losses with, 177–78; role in tax shelter investment, 194–210; TRA86 provisions of, 194, 224, 226–27
- Real estate tax shelter, 206–10
- Revenue: effect of tax caps on, 155–61; effects of changing tax treatment for health insurance, 156–61; levels with changes in women's labor force participation, 49–53; loss from subsidy for employer-provided health insurance, 152
- Risks: in cattle-feeding tax shelter, 198; with equipment leasing, 201. *See also* At-risk rules, U.S. tax code
- S-corporations: shift in activity to, 183–85; under TRA86, 177n3

- Spending, medical care: after-tax cost of out-of-pocket, 140–41; data sources, 136, 142–48; of individuals with and without insurance, 141; tax subsidy, 137–38
- Statistics of Income (SOI). *See* Internal Revenue Service (IRS)
- Stone-Geary utility system, 80–81
- Subsidies. *See* Effective subsidy rate (ESR); Tax subsidy
- Take-up rates: CCTC by income level (1989), 112–13; for tax relief by income level (1989), 107–11
- Tax arbitrage, 232–33
- Tax caps: analysis of, 153–61; proposed for employer-provided health insurance, 152–53
- Tax causality hypothesis, 171
- Tax credit. *See* Child care tax credit (CCTC); Investment tax credit (ITC)
- Tax exemption, employer-provided health insurance, 152–61
- Tax incentives: in employer-provided health insurance, 135–36; investment tax credit as, 201
- Tax liability: deferred under tax shelter, 196–97, 199–200; estimated ERTA reductions, 11; with investment tax credit, 201; reduction under tax shelters, 193–94; reduction with child care tax credit, 129
- Taxpayers, married: ability to pay, 103–4; analysis of reform alternatives for, 58–71; current tax situation, 59–60; effect of secondary earner flat tax, 67–69; penalties and bonuses, 59–60, 62–63t, 65t; separate filings under alternative rules, 69–71; taxation of earnings in United States, 39; tax relief for child care, 101–5. *See also* Women, married
- Tax rates, individual income cuts, 183–85

The Effects of Taxation on Multinational Corporations

Edited by MARTIN FELDSTEIN, JAMES R. HINES, JR., AND R. GLENN HUBBARD

In ten in-depth analyses, leading experts assess the design of international tax rules, their effects on the financing decisions of multinational enterprises, their impact on the costs of international business, and the role of investment by multinational firms in the U.S. economy.

An NBER Project Report

International Comparisons of Household Saving

Edited by JAMES M. POTERBA

This volume provides the most up-to-date analyses of patterns of household saving behavior in Canada, Italy, Japan, Germany, the United Kingdom, and the United States.

An NBER Project Report

Public Policies and Household Saving

Edited by JAMES M. POTERBA

A detailed summary of the saving incentives in the G-7 nations, this volume compares government policies on household saving in the United States, Canada, France, Germany, Italy, Japan, and the United Kingdom. Each chapter focuses on one G-7 nation and covers government policies toward taxation, finance, and insurance.

An NBER Project Report

Housing Markets in the United States and Japan

Edited by YUKIO NOGUCHI AND JAMES M. POTERBA

This volume compares household markets in the United States and Japan to illustrate how differences in financial regulations, tax rules, and other public policies can affect saving patterns, wealth accumulation, and capital flows in the two economies. Ten essays discuss the evolution of housing prices, housing markets and personal saving, housing finance, commuting, and the impact of public policy on housing markets.
