

## SUBJECT INDEX

- Abortion, studies on, 20, 25-26
- Adjusted Family Income (AFI): as accrued income concept, 71; derivation of, from SEO-Census, 71; equal to national income, 71; MERGE file and, 68 ff.
- Ad valorem tariffs, 336
- Advisory Council on Social Security, 96, 106
- Aged, 89 ff.; economic situation of, 90, 375; maintenance of standard of living of, 92; relative concept of income adequacy for, 103
- Agency for International Development (AID), 29
- "American Roulette" (national health policy in U.S.), 109
- Argentina, 22, 274n, 318; automobile industry, 167; census samples from, 21; cost of export subsidies (macromodel), 341-43; ECIEL study, 273, 288, 303, 307; experimental census, 21, 23; growth model, 345; incentive measures study in, 337; OMUECE tabulations for, 28; stability vs. growth, 188
- ARIES Corporation, and OEO project, 60, 61
- Assist Corporation, and OEO project, 60, 61, 373
- Asuncion, ECIEL study in, 273
- Austria, study of social security system in, 94, 375
- Automation: benefits, 16; costs, 16; development time required, 16; implementation problems, 7-11; individuals vs. committees, 8; need for, 17; overall design for project, 7; process of, 15; survey, advantages of generalized programs, 11; systems and subsystems, 8
- Automobile industry in Latin America, 167
- Baer-Kerstenetzky framework, 139, 140-42, 141n, 142n
- Balassa method for calculating effective rate of protection, 332-33
- Banco Central de Venezuela, 289, 293n
- Barranquilla, ECIEL study in, 273
- Behrman-Klein model, 139, 142, 144-47, 149
- Belen village, experimental census in, 21, 23
- Belgrade, World Population Conference in, 24
- Bogota: ECIEL study, 273; fertility surveys, 21, 24; surveys on abortion and use of contraceptives, 21, 25
- Bolivia, 20, 274n; census samples from, 20; ECIEL study, 273, 289, 303, 307
- Brandeis University, Levinson Gerontological Policy Institute at, 89
- Brazil, 22, 23, 274n, 318; census samples from, 21; Cobb-Douglas-type functions for, 143; ECIEL study, 273, 289, 303, 307; macroeconomic models of, 139-49, 376 (*see also* Baer-Kerstenetzky; Behrman-Klein; ECLA-Fukuchi; Liu-DeVries; Naylor et al; Ten-year plan; Three-year plan; Tintner et al); projection in, 333-36; simulation model of, 151-59
- Brazilian Census Bureau (IBGE), 151
- Brazilian Institute of Economics of Getulio Vargas Foundation, 139, 143, 151, 289, 293n, 314
- Brazilian National Accounts, 145, 147
- Brookings Institution: and ECIEL, 269, 270, 271, 272, 278, 280, 291n, 293n, 294, 295, 297, 301, 302, 305, 313, 314, 315; MERGE data file, 67-87, 373, 374, 375; and OEO project, 60, 61, 373; PDP-10 computer, 70, 127
- Bruno ratio, 333
- Buenos Aires: ECIEL study, 273; fertility surveys, 21, 24, 30; surveys on abortion and use of contraceptives, 21, 25
- Bureau of Economic Analysis, 38, 375
- Bureau of Labor Statistics, 41, 256, 261
- Business Conditions Digest*, 33, 34, 36, 41, 44
- Cali, ECIEL study in, 273
- Canada, analysis of social security system of, 94, 97. *See also* Census, Canadian; Statistics Canada
- Canton Grecia, experimental census in, 21, 23
- Capital accumulation, in developing economies, 164
- Caracas: CLASCO meetings in, 19; ECIEL study, 273; fertility surveys, 21, 24; National Bureau of Statistics of, 26; survey on migration to metropolitan areas, 21, 26-27
- Cauquenes (Chile), Experimental Demographic Survey in, 20, 23-24
- CELADE. *See* Latin American Center for Demographic Studies
- Census, Canadian, 6, 7, 12, 14, 16
- Census, experimental, 23, 30
- Census, Latin American, 31; experimental, 22-23; recommendations of seminar on, 20
- Census, U.S., 370; use in microanalytic simulation model, 11
- Census Information System, 16
- Census questionnaires, variables in, 21
- Census-taking, theory of, 4
- Center for Educational Studies, Mexico, 231
- Central Information System, in U.S., 48
- Central register, 6, 7, 15, 371
- Centro de Desarrollo (CENDES) of the Universidad Central de Venezuela, 289, 293n, 347
- Centro de Estudios Economicos y Demograficos of El Colegio de Mexico, 289, 293n, 314
- Centro de Estudios sobre Desarrollo Economico (CEDE), Universidad de Los Andes, 32, 289, 293n, 314
- Centro de Investigaciones Sociales, Economicas, Politicas y Antropologicas (CISEPA), 289, 293n
- Centro Paraguayo de Estudios de Desarrollo Economico y Social (CEPADES), 289, 293n
- CEPLAN (Center of Studies on National Planning), Chile, 205n

- Chile, 22, 274n, 377  
 —automobile industry, 167  
 —Center for National Planning Studies of Catholic University, 191  
 —cost-benefit ratio in, 197  
 —development alternatives, 191–209: export promotion and reduction in external dependency, 191, 195–209; external aid, 191, 195; historical growth pattern, 191, 192–93; internal savings and import substitutions, 191, 193–94; macroeconomic results, 193t; sectoral implications, 202  
 —ECIEL study, 273, 289, 303, 307  
 —experimental demographic survey, 21, 23–24  
 —export promotion, 191, 194, 195–209, 196–97t  
 —exports, concentration vs. diversification, 203–9, 206t, 207t; and unemployment, 207  
 —foreign sector, 191, 195  
 —full employment objective, 191–209, 194  
 —import substitution policy, 194  
 —income redistribution, 191n  
 —inflation, 167  
 —Interdisciplinary Research Program in Education (PIIE) of Catholic University, 231  
 —labor intensive vs. capital intensive activities, 202  
 —Marginal Savings Rate (MSR), 194, 195, 196–97, 201, 202, 205, 207  
 —multisectoral programming model of, 191–209: computer used, 192; description, 191–92; equations of, 207; external sector, 192; investment determined in, 192; production sectors (see Chile, production sectors in); variables and parameters, 208–9  
 —OMUECE tabulations, 28  
 —production sectors in, 192, 197: agriculture, 202; basic metals industry, 201, 205; chemical industry, 202, 203; competitive imports, 197t; concentration vs. diversification, 207t; consumption industry, 202, 203; copper industry, 191, 192, 201–2, 203, 205; exports, 204t, 206t; idle capacity, 196, 205; import substitution, 200t; internal savings, 196–97t; investment, 198t; metallurgical industry, 201, 203, 205; noncopper mining industry, 201, 205; optimizing model, 196–200t; RAS input–output matrix, 192  
 —protection in, 333–36  
 —sectoral priorities, 202–3  
 —shadow prices in, 197  
 —stability vs. growth, 188  
 CLASCO. *See* Latin American Council of Social Sciences  
 Closure, value of in auxiliary aggregative model, 113  
 CMEA (Council for Mutual Economic Assistance), 313  
 Cobb-Douglas-type functions for Brazilian economy, 143  
 Cochabamba, ECIEL study in, 273  
 Coefficient of variation, 325  
 Colegio de Mexico, 289, 293n, 314  
 Colombia, 274n, 380–81; ECIEL study, 273, 289, 303, 306–8; fertility surveys, 21, 25, 32; incentive-measures study, 337; internal migration, 30; OMUECE tabulations, 28; stability vs. growth, 188  
 Comparability, in international price studies, 322, 324–25  
 Conference Board, and National Bureau's Time Series Data Bank, 38  
 Confidentiality, problem of, 1, 4, 11–15, 371  
 Consumer purchasing power, in Common Market countries, 327–29  
 Consumption in Latin America, comparisons of, 269–89  
 Contraceptive use: effectiveness of according to education class, 120; surveys on, 20, 25–26  
 Corden method for calculating effect rate of protection, 332–33  
 CORFO (Industrial Development Corporation) in Chile, 203, 203n  
 Cornell University, and OEO project, 373  
 Costa Rica: experimental census, 21, 23; fertility surveys, 21, 25, 32; OMUECE tabulations, 28  
 Cost-benefit ratio, 16–17; in Chile, 197  
 Costs of protection, static and dynamic, 335  
 Council for Mutual Economic Assistance (CMEA), 313  
 Council of Economic Advisors, 44  
 Cuba, census samples from, 20  
 Cuernavaca conference, 369–85  
 Current Population Survey (CPS), 59, 60, 375  
 Data: changes due to computer processing, 5; dissemination costs, 16; errors, 6, 7; exposure of weaknesses, 5; independence of, 14; integrity of, 4; interrelation of, 2; problems of, 4–7; processing, 3, 270; reliability, 4, 15; security of, 3, 4, 5, 15; storage, 3, 4, 5  
 Data banks, 6, 7, 372–73; micro-economic (see Micro-economic data bank); time series (see National Bureau of Economic Research Time Series Data Bank)  
 Data-element dictionary, 6  
 data technician, 63–64  
 Delphi method, 231, 232, 237, 238, 239, 248  
*Demography*, 24  
 Departamento Administrativo Nacional de Estadística (DANE), 314  
 Desk-side Time Sharing System, 42  
 Developing economies: characteristics of, 162–68; (see also Capital accumulation, Exports of primary goods, External debt, Foreign investment, Government and political change, Income distribution, Inflation, Labor force, Labor migration, Lags in economic reaction, Money supply, Overcapacity, Population growth, Supply deficiency, wages); Keynesian view of, 163, 165; macroeconomic models for, 161–68, 190

- Diary method, 270  
 Dictionary, data-element, 6  
 Digital Equipment Corporation, 126  
 DINAMICO. *See* Mexico, macroeconomic model of  
 Disclosure, residual vs. direct, 12; statistical, 13; testing, rules for, 13  
 Discounted consumption, 213, 214, 224, 225, 215-22t, 228  
 Disturbances, random, 12  
 Divorce: probabilities, 126; rates, historical compared to simulated in U.S., 123t  
 Dodge Corporation, and National Bureau's Time Series Data Bank, 38  
 Domar equation, 140  
 Dominican Republic, 22; census samples, 21; OMUECE tabulations, 28  
 Dual Independent Map Encoding System (DIME), 370  
 Dual operation, problem of, 9  
 Dun & Bradstreet, and National Bureau's Time Series Data Bank, 30  
 Durbin-Watson statistics, 154

 —automobile industry, 167  
 —development phase, 212  
 —discounted consumption in, 213, 214, 215–22t, 224, 225, 228t  
 —"dualistic" pattern development, 227  
 —ECIEL study, 273, 289  
 —economic alternatives: effects on employment and income distribution, 226–29; effects on foreign exchange, 225–26; quantitative analysis, 211–29  
 —economy: effect of 1969–70 U.S. recession on, 183; features of, 169; forecasts, 182  
 —education system, enrollment, 243t; Markovian model, 231, 232, 240 (See also Mexico, global education model)  
 —employment problem in, 226–29  
 —fertility surveys, 21, 25  
 —foreign exchange, 212, 225–26; and economic alternatives, 225–26; efficiency price of, 225; marginal productivity of, 226;  
 —global education model, 231–49; aim of, 232, 246; capital expenditures calculated by, 236; characteristics of, 233; continuous variables in, 233; definition of available resources and limits, 250–51; definition of coefficients used, 250; definition of education system, 233; definition of equations and inequalities, 251; definition of variables used, 249; Delphi method in, 231, 232, 237, 238, 239, 248; dropouts calculated by, 238, 242t; enrollment calculated by, 236–37; equations in, 234t, 236–38; estimation of parameters, 239, 240–45t; improved efficiency of system calculated by, 237; intertemporal relationships in, 233t, 234; objective function in, 233, 234–36; operating costs of education system, 235, 240t; optimal solution furnished by, 233, 234; problem of uncertainty, 231; rates of repetition calculated by, 238, 242t; requirements of, 232; restrictions of, 236–8; space requirements of students, 237; student-teacher ratio, 239, 240; supply of
