## Subject Index

---

- Assembler-supplier system, of Japanese firms, 22
- Association of Southeast Asian Nations (ASEAN): joint ventures in, 211–12; proposed free trade area, 21
- Bank runs, in Asian currency crises (1997), 278
- Bretton Woods system, 1
- Capital: capital stock in China, 220–25, 231–33; partial capital stock adjustment model, 215–19, 235; policies to attract foreign, 1–2, 49, 204, 213, 218–19
- Capital flows: into China (1992–96), 242–43; different effects of different types of, 4; of FDI to Taiwan, 353–55; Hong Kong as entrepôt for goods and, 265; international flows of long-term private, 1–3; inward FDI reduces country vulnerability, 4; Korean inward and outward, 316; as substitute for trade in goods, 3; volatility of portfolio flows, 3–4. *See also* Foreign direct investment (FDI); Outward foreign direct investment (OFDI)
- China: capital inflows (1992–96), 242–43; differences in statistical reporting of FDI flow to, 260t, 262; Economic and Technological Development Zones, 218–19, 229, 232, 237–38; experience with FDI, 213–14; form and location of FDI in, 217–18; Japanese FDI in, 55; local content rules, 25, 117n8; Open Coastal Areas and Cities, 218–19, 232, 237–38; performance as host to FDI, 245–57; policies to attract FDI to, 218–19; realized FDI in (1983–98), 240–42; regional FDI capital stock (1982–95), 214–20; regulatory and other obstacles to FDI in, 257–58, 264; source countries of FDI in, 243–45, 257, 259, 260, 262–63; Special Economic Zones, 218–19, 228–29, 232, 235, 237–38
- Comparative advantage: in Heckscher-Ohlin-Samuelson trade model, 3; of U.S. and Japanese affiliates in Asian host countries (1977), 150–52
- Corruption: indexes and ratings of, 248–49; U.S. and Japanese investor response to host country corruption, 253–55
- Count data models, 129–31
- Currency crisis: analysis using pooled data for IMF rescue loans and currency crashes (1973–94), 281–84; Asian and Mexican, 3–4, 292–94; cross-sectional analysis of IMF rescue loans and (1994–97), 279–81, 286t; Korea, 269; role of FDI in, 3–4, 278–84
- Customs union: absence in East Asia, 211; price disadvantage for imports from

- Customs union (*cont.*)  
 country outside customs union, 209;  
 tariff reduction in, 210; between Tur-  
 key and European Union, 210
- Data: contractual amount and realized  
 value in Chinese FDI data, 241; count  
 data models, 130; to study role of  
 MNEs in host countries, 147–48
- Data sources: analysis of FDI capital stock  
 in China, 230; analysis of FDI effect  
 on Taiwan's economic growth, 357,  
 361–62, 365–66; analysis of Japanese  
 firms' intraindustry technology trans-  
 fer, 70–72; analysis of Korean outward  
 FDI, 301, 303, 313–14; China's perfor-  
 mance as host to FDI, 246–49; con-  
 tribution of Japanese firms to host  
 country local content, 14, 18–20, 36,  
 46–47; corruption indexes and ratings,  
 248–49; effect of FDI on productivity  
 in Korea, 276; FDI and export impact  
 on potential for spillover, 126–27, 137–  
 38, 142; Japanese Patent Office, 142;  
 MNE internalization and sector switch-  
 ing, 80–81, 83–87, 108; pattern of re-  
 structuring in Taiwan's textile industry,  
 329–30, 348; relation of FDI to eco-  
 nomic growth in Taiwan, 349; for  
 value of electronic parts and compo-  
 nent production, 24–25
- Developed countries: effect of economic in-  
 tegration on firms in, 198–202, 204;  
 Korean outward FDI in, 306–7;  
 profitability of international joint ven-  
 tures in, 207. *See also* Japan; United  
 States
- Developing Asia: defined, 148; manu-  
 factured exports (1977), 149–53; post-  
 1977 changes in export composition,  
 149; products and exports (1977–95),  
 155–59, 166–67t; R&D intensity  
 (1977–95), 155–56, 186; role of U.S.  
 and Japanese MNEs in, 149
- Developing countries: effect of economic in-  
 tegration on firms in, 198–202, 204;  
 efforts to attract foreign capital, 1–2,  
 49, 204, 213, 218–19; FDI to (1990–  
 97), 1; foreign affiliates of Japanese  
 firms, 157–59; import substitution poli-  
 cies (1950s–1960s), 2, 268; joint ven-  
 tures in, 204–7, 211–12; outward for-  
 eign direct investment of, 295; R&D  
 intensity in Asian, 155–56; share of  
 Korean outward FDI to, 306–9; wel-  
 fare effects of joint ventures or FDI in,  
 207. *See also* China; Developing Asia;  
 Hong Kong; Indonesia; Korea; Malay-  
 sia; Philippines; Singapore; Taiwan;  
 Thailand
- Economic and Technological Development  
 Zones, China, 218–19
- Economic integration: basic model with for-  
 mation of joint ventures, 194–97; coun-  
 try characteristics influencing local,  
 24–26; defined as free trade area for  
 joint venture analysis, 192, 207; effects  
 of, 193, 198–202, 204; Japanese foreign  
 affiliates, 33–34; monetary integration,  
 208; scale effect from, 208. *See also*  
 Customs union
- Employment: joint ventures create new,  
 207, 211; in Taiwan's textile industry,  
 331–32
- Exports: from developing Asia (1977–95),  
 155–59; in economic integration  
 model, 194–98; of garments and fab-  
 rics from Taiwan, 324–27; from manu-  
 facturing sector in developing Asia  
 (1977), 149–53; from manufacturing  
 sector of eight Asian countries (1977),  
 153–57; relation of knowledge spillover  
 to, 116, 118–37, 141–43; relation of  
 Korean outward FDI to, 301–7; of  
 Taiwanese textiles, 322. *See also* Cap-  
 ital flows; Outward foreign direct invest-  
 ment (OFDI)
- Factor services, capital-scarce country with  
 FDI obtains, 44
- Firms, Japanese: assembler-supplier system,  
 22; patents, R&D, and employees with  
 and without U.S. FDI, 127–28
- Five-Year Foreign Investment Liberaliza-  
 tion Plan (1994), Korea, 269
- Foreign affiliates: analysis of vertical link-  
 ages in host countries, 15–18; effect of  
 government subsidy on joint venture,  
 202–3; in international joint venture,  
 194–97; with intrafirm technology  
 transfer, 56–58. *See also* Vertical  
 linkages
- Foreign affiliates, Japanese firms: country  
 dummy Tobit model, 26–30; differ-  
 ences in vertical linkages in greenfield

- and acquired, 22–24; effect of *keiretsu* intensity on, 26–30, 42; embeddedness in Asian host countries, 44–46; exports from developing Asian countries (1977–95), 157–59; FDI as measure of greenfield investment, joint venture, and acquisitions, 128–29; foreign local acquisitions and greenfield plants, 22–24; integration in local economy of acquired and greenfield, 33–34; local content ratios, 30–35, 42; manufacturing exports (1977), 149–53, 185; patents obtained in United States, 127–28; production and exports in individual Asian countries (1977–95), 159–65, 186–89; production for export and local markets, 23–24; R&D intensity in developing Asian countries (1977–95), 155–56; sector switching by, 87–93; transfer of technology from parent to, 55–69; vertical linkages in manufacturing sector, 18–33
- Foreign affiliates, Korean firms, 301, 308
- Foreign affiliates, Taiwanese firms: fabric production, 325–27; garment industry, 324–25, 340; yarn production, 327–28
- Foreign affiliates, U.S. firms: exports from developing Asian countries (1977–95), 156–59; manufacturing exports (1977), 149–53, 185; production and exports in individual Asian countries (1977–95), 159–65, 176–83t, 186–89; R&D intensity in developing Asian countries (1977–95), 155–56
- Foreign Capital Inducement Act (1960), Korea, 268
- Foreign direct investment (FDI): benefits of, 44–45; channels to induce Taiwan's economic growth, 350; as component of private capital flows, 1; from East Asian countries into Southeast Asian countries, 2–3; effect on domestic industrial sector, 320; efforts of developing countries to attract, 1–2, 49, 204, 213; Hong Kong as magnet for, 255–57; of Japan and United States in Taiwan, 353–55; into Korea, 297, 316; motivation in OLI (ownership-location-internalization) framework, 79; partial capital stock adjustment model, 215–19, 235; relation of exports and FDI to knowledge spillover, 116, 118–37, 141–46; role in currency crises, 278–84; as Schumpeterian innovation, 319–20, 343; in Taiwan's textile industry, 321–23; technology transfers with, 49. *See also* Joint ventures (JVs); Outward foreign direct investment (OFDI); Spillovers
- Foreign direct investment (FDI), China, 213–14; differences in statistics reporting flow into, 260t; obstacles in China to, 257–58, 264; performance as host to, 245–57; source countries of, 243–45, 257, 259, 260, 262–63
- Foreign direct investment (FDI), Japan: acquisition and greenfield, 122–25; benefits for host economies, 14; change in pattern of, 54–55; contrasting views of, 11, 13; decline (1990s), 54; effect on parent firm in Japan, 117–18; factors influencing levels of (1981–96), 51–55; flows to Asia, Europe, and United States (1989, 1992, 1994), 113–14, 116; by industrial sector (1981–96), 51, 53–55; recent empirical work, 16; by region (1981–96), 51–52, 54–55
- Foreign direct investment (FDI), Korea: effect on productivity, 272–77; history of policy in, 268–70; trends in and sectoral composition of, 270–72
- Foreign Investment Promotion Act (1998), Korea, 269–70
- Foreign subsidiaries. *See* Foreign affiliates
- Free trade area (FTA): as economic integration, 192, 207; proposed ASEAN, 211; tariffs in, 198–202
- Generalized method of moments (GMM): estimation procedure for China's FDI capital stock, 231–33; estimation results of China's FDI capital stock, 220–25
- General trading companies (GTCs), Japan: structure and function, 83, 108–9
- Heavy and Chemical Industry Promotion Plan (1970s), Korea, 268–69
- Hong Kong: export patterns (1977), 153–55; foreign-owned firms in, 161; as host country for FDI, 255–57; as individual developing Asian country, 148; investment in China, 213, 243–45; inward and outward FDI, 3; products and exports (1977–95), 159–63, 174–83t

- Host countries: benefits of FDI to, 49;  
 China as host to FDI, 245–65; effect of local content rules in, 13–14; interest in attracting FDI, 1–2, 49, 204, 213, 218–19; technology spillover in, 44; vertical linkages of Japanese firms in, 13. *See also* Developing countries; Local content (host country); Vertical linkages
- Idiosyncrasy hypothesis, 41
- Imports, in economic integration model, 199–202
- Import substitution: in developing countries (1950s, 1960s), 2; Korea (1950s), 268
- Indonesia: currency crisis (1997), 278; export patterns (1977), 153–55; as individual developing Asian country, 148; Japanese MNEs in, 11–12; products and exports (1977–95), 159–63, 174–83t
- Industrial sector, domestic: effect of FDI on, 320; effect of relocated overseas production, 320; restructuring in Taiwan (1980s to present), 352n2. *See also* Manufacturing sector; Textile industry, Taiwan
- Innovation: FDI as Schumpeterian, 319–20, 343; impact of international knowledge spillovers on, 122–25
- Integration. *See* Economic integration
- International Monetary Fund (IMF): cross-sectional analysis of rescue loans (1994–97), 279–81; pooled data analysis of currency crashes and rescue loans (1973–94), 281–84, 287–88t
- Investment, domestic: effect of Korean outward FDI on, 299–301; overseas financing of Korean, 307–8
- Japan: character of production in, 11; as exporter of private capital, 2; outward FDI, 3; spillovers from FDI in Asia, 10–11. *See also* Firms, Japanese; Foreign affiliates, Japanese firms; Foreign direct investment (FDI), Japan; General trading companies (GTCs), Japan; Manufacturing sector, Japan; Multinational enterprises (MNEs), Japan; Supplier networks, Japanese
- Joint ventures (JVs), international: effect of economic integration on, 193; effect of government subsidy on, 193, 202–3; efforts of developing countries to attract, 204; in free trade area, 198–202; goals of, 210; maturing in developing countries, 211–12; subsidies to, 193, 202–3, 210–11; Taiwan-Japan textile fiber producers, 328. *See also* Spillovers
- Keiretsu* firms: firm relationships in vertical, 21–22; intra-*keiretsu* procurement, 21; investment in Asia by, 22
- Knowledge, proprietary, 123. *See also* Spillovers, knowledge; Spillovers, technology
- Korea: currency crisis (1997), 269, 278; effect of outward FDI on domestic investment, 299–302; as exporter of private capital, 2; export patterns (1977), 153–55; history of FDI policy in, 268–70, 297; IMF financial arrangements, 267; as individual developing Asian country, 148; legislation targeting FDI, 268–70; outward foreign direct investment (1990s), 295–99; products and exports (1977–95), 159–63, 174–83t; role of *chaebols* in outward FDI, 313–15; trends in and sectoral composition of FDI in (1962–98), 270–72, 297. *See also* Foreign affiliates, Korean firms; Foreign direct investment (FDI), Korea
- Local content (host country): contribution of foreign-owned affiliates, 20; definition, 41–42; empirical work on rules, 17–18; Japanese electronics firm affiliates in Asia, 14; overseas firms with *keiretsu* membership, 22; rules to increase, 25–26, 117
- Local content ratio: country variable Tobit model, 30–32; of Japanese electronics foreign affiliates, 20; levels of, 24; as measure of foreign affiliate's value, 20; Tobit country dummy model, 26–30
- Malaysia: currency crisis (1997), 278; export patterns (1977), 153–55; as individual developing Asian country, 148; Japanese MNEs in, 11–13; products and exports (1977–95), 159–63, 174–83t; Taiwanese FDI in, 322, 328–29
- Manufacturing sector: exports from developing Asia (1977), 149–53; R&D inten-

- sity of exports from developing Asia, 155–59
- Manufacturing sector, Japan: in Asian host countries, 11–13; local content in Asian host countries, 13–14; local content rules in host countries, 15–18; ownership of foreign affiliates, 93–101; supplier networks, 15–18
- Manufacturing sector, Taiwan: effect of FDI on economic growth, 355–61; FDI as source of capital for, 355; growth rate (1960s to present), 351–52; variables in industries (1978–94), 357–58. *See also* Textile industry, Taiwan
- Manufacturing sector, United States: Japanese FDI in, 113–14
- MNEs. *See* Multinational enterprises (MNEs)
- Moral hazard, of financial intermediaries in Asian currency crises, 278
- Multinational enterprises (MNEs): concern about technology transfer, 49–50; internalization decisions, 79–81; intrafirm technology transfer, 56–58; intraindustry restructuring, 320; Korean, 306, 308; location decisions, 79–81; role in host country trade, 148; sector switching, 81; technology transfer to foreign affiliates, 50; technology transfer within, 55–69. *See also* Foreign affiliates
- Multinational enterprises (MNEs), Japan: contrasting views of host country role, 11–13; determinants of intrafirm technology transfer, 61–71; FDI role in Asian countries, 147–49; intrafirm technology transfers, 58–61; role in Southeast Asian countries, 11–13; sector switching by, 81–87, 93–101; share of employment in host countries, 11–12; sourcing of components and materials, 20–21; vintage effect, 13
- Multinational enterprises (MNEs), United States: FDI role in Asian countries, 147–49; sector switching by, 81–87
- Nash bargain, in economic integration model, 195–98, 209–10
- Negative binomial estimator, 129–31
- Newly industrialized economies (NIEs): Asian exporters of direct investment, 295; products of intermediate technology in, 11
- North American Free Trade Area, 192
- Open Coastal Areas and Cities, China, 218–19, 232, 237–38
- Outward foreign direct investment (OFDI), Korea: effect on domestic performance of, 299–306; foreign-source financing of, 300–301, 307–8; geographic locations of, 3, 298–99; ratio of OFDI to GDP, 306, 316; role of *chaebols* in, 313–15, 317; trends and motives (1981–96), 296–300, 316–17
- Overseas subsidiaries. *See* Foreign affiliates
- Patents: data sources for Japanese, 142; of Japanese firms in United States, 127–28
- Philippines: export patterns (1977), 153–55; as individual developing Asian country, 148; Japanese MNEs in, 11–12; products and exports (1977–95), 159–63, 174–83t; Taiwanese FDI in, 322, 328–29
- Productivity: effect of FDI in Korea on, 272–77, 285t, 290–91; effect of FDI on host country's, 9; foreign affiliates as channel for growth of, 45–46; total factor productivity of Japanese foreign affiliate and parent firm, 50, 74
- Productivity growth: contribution of Taiwan's manufacturing sector, 352–53; historical Taiwanese, 351–52; related to specialized product line, 334; role of spillovers in, 10; technological progress as vehicle for, 350
- Research and development (R&D): impact of FDI on parent firms' benefiting from, 118; intensity, of firms exporting from developing Asia (1977–95), 155–59; intensity, of parent firm correlated with negative local content effect, 21–22, 26–30, 42; as knowledge spillovers with exports and FDI, 116, 118–37, 141–46; in measurement of knowledge spillovers, 118–22
- Sectoral distribution: of foreign affiliates of Japanese firms, 58–60; of Korean exports, 301–6; of Korean outward FDI, 298, 304; sector switching by Japanese foreign affiliates, 87–93; sector switching by Japanese MNEs, 80–87, 108–10;

- Sectoral distribution (*cont.*)  
 sector switching by Japanese parent firms, 93–101. *See also* Industrial sector; Manufacturing sector
- Singapore: export patterns (1977), 153–55; as individual developing Asian country, 148; inward and outward FDI, 3; products and exports (1977–95), 159–63, 174–83t; seeking foreign capital, 2
- Special Economic Zones, China: to attract FDI, 218–19; in Guangdong, Hainan, and Fujian, 228, 238; impact of, 229; Shanghai's Pudong New Zone, 229
- Specialization: Herfindahl index to verify trend in, 334–35; of Japanese FDI in Asian countries, 11; product lines in Taiwan's textile firms, 334; in Taiwan's textile industry, 320–22, 324–29, 334–43
- Spillovers: absorptive capacity of local economy, 9–10; as benefit of FDI, 44; defined, 41; empirical literature on FDI, 10; in FDI know-how, 9–10
- Spillovers, knowledge: framework for measuring, 118–22, 142; geographic localization of, 122; impact of FDI and exports on international, 122–23; relation between FDI and, 142–43; relation of exports and FDI to, 116, 118–37, 141–46
- Spillovers, R&D: channels in international, 115; dominance of effects of intransnational, 122; international, 122. *See also* Spillovers, knowledge; Spillovers, technology
- Spillovers, technology: as benefit of FDI, 44; foreign affiliates as channels for, 45–46; forms of, 50; of joint ventures in developing countries, 207; measured by local procurement ratio, 74–75. *See also* Technology transfer
- Supplier networks, Japanese: literature about, 15–18; replication abroad, 22; variables at country level, 24–26, 36–37
- Suppliers, foreign-owned, 20
- Taiwan: as exporter of private capital, 2; export patterns (1977), 153–55; FDI of fiber producers in Southeast Asia, 322; foreign-owned firms in, 161; as individual developing Asian country, 148; investment in China, 213; outward FDI, 3; products and exports (1977–95), 159–63, 174–83t; seeking foreign capital, 2. *See also* Foreign affiliates, Taiwanese firms; Manufacturing sector, Taiwan; Textile industry, Taiwan
- Tariffs: in customs union, 210; in economic integration model, 194–202; effect of economic integration on, 198–202; effects of changes in rates, 193; in free trade area, 198–202; with unilateral trade liberalization or multilateral arrangements, 211
- Technology transfer: determinants and levels of Japanese MNE intrafirm, 56–58, 60–71; forms of international transfer, 49; intrafirm, 50; measurement of, 50; measurement of Japanese intrafirm, 60–62, 74–77; spillover, 50
- Textile industry, Taiwan: effect of FDI in shift in composition (1986–96), 321–23; employment and output value (1986–96), 321–23; fabric production, 325–27; FDI in garment firms, 324–25; pattern of restructuring in, 329–43; product composition change index, 337–39, 348; product concentration and specialization in, 334–35; product line change index, 338–39; restructuring in FDI and non-FDI firms, 335–43; shift in major product lines in FDI and non-FDI firms, 335–41; yarn production, 327–28
- Thailand: currency crisis (1997), 278; export patterns (1977), 153–55; as individual developing Asian country, 148; products and exports (1977–95), 159–63, 174–83t; Taiwanese FDI in, 322, 328–29
- Trade: Asian countries' intraregional and intraindustry, 11; capital flows as form of, 3; Heckscher-Ohlin-Samuelson model of, 3; as vehicle for technology transfer, 49. *See also* Free trade area (FTA)
- Trade liberalization: in Korea, 268–69; unilateral and multilateral arrangements with, 211
- United States: FDI into Taiwan, 353–55; flow of Japanese FDI into, 113–14, 116; patents of Japanese firms in, 127–28. *See also* Foreign affiliates, U.S. firms; Manufacturing sector, United

- States; Multinational enterprises (MNEs), United States
- Value chain, local, 20
- Vertical linkages: benefits of Japanese firms in Asian host countries, 13–14; country dummy Tobit model, 26–30; country variable Tobit model, 30–32; determinants, 22–23; factors influencing extent of, 24; model of Japanese manufacturing affiliates in Asia, 18–26; previous analyses, 15–18
- Vintage effect, 33, 41
- Welfare effects: in economic integration model, 211; of international joint ventures or FDI in developing countries, 207, 211

## BOOKS OF RELATED INTEREST

### **Deregulation and Interdependence in the Asia-Pacific Region**

EDITED BY TAKAYOSHI ITO AND ANNE O. KRUEGER

These essays explore the broadly similar experiences of certain economies in the region—China, Hong Kong, Japan, Korea—in dealing with the potentially volatile process of deregulation, and examine the East Asian response to a rapidly transforming economic environment. *NBER–East Asia Seminar on Economics, Volume 8*

### **Changes in Exchange Rates in Rapidly Developing Countries: Theory, Practice, and Policy Issues**

EDITED BY TAKAYOSHI ITO AND ANNE O. KRUEGER

The exchange rate is a crucial variable linking a nation's domestic economy to the international market. Thus choice of an exchange rate regime is a central component in the economic policy of developing countries and a key factor affecting economic growth. This volume explores the impact of such diverse exchange rate regimes in both historical and regional contexts, focusing particular attention on East Asia.

*NBER–East Asia Seminar on Economics, Volume 7*

### **Regionalism versus Multilateral Trade Arrangements**

EDITED BY TAKAYOSHI ITO AND ANNE O. KRUEGER

This volume contains thirteen papers that analyze the tensions between multilateral trading systems and preferential trade arrangements and the impact of these tensions on East Asia. The first four chapters introduce preferential trading arrangements (PTAs) conceptually and focus on the unique political issues that these agreements involve. The next five essays present more direct empirical analyses of existing PTAs and their economic effects. The last four papers concentrate on the outcomes of individual trading policies of East Asian nations. *NBER–East Asia Seminar on Economics, Volume 6*
