Chapter pages in book: (p. 62-101)

## Appendix B

Notes on How Federal Expenditure Data<br>Were Derived, and Appendix. Tables

The ngures in the long serics, 1794-1952, are not wholly consistent. From 1789 throngh 1842 the government finances were on a calendar-year basis, but beginning with 1844 the fiscal year cuding June 30 was adopted. Thus ithe expenditures for 1843 inchude only the six months from January 1 through june 30 .

Previons to 1916 the expenditures are expressed in warrants issued. Accountable warrants place funds to the credit of disbursing officers, who then draw checks in payment of government obligations. Thus the warrants are not expenditures, but only sums destined to be spent, and deposited for that purpose in the accounts of disbursing officers with the Treasury. Not all such authorizations result in the payment of money during the year in which they are given. Because of variations in the carry-over of balances, the total of warrants issued does not indicate, between years, the exact difference in expenditures. ${ }^{1}$ This method of reporting is no longer used.

Beginning with 1916 federal expenditures are reported on the daily Treasury statement basis, which is the amount of the checks paid each day by the Treasurer of the United States. The total is compiled from transcripts of payments made by the Federal Reserve Banks and other govermment depositaries and therefore is a

1 See almost any Trasury Department Combined Statement of Receipts, Expendi. tures and Balances of the Uniued States Government or Anmual Report of the Secretary of the Trasury on the State of the Finances, for an explanation of this and other bases of reporting expenditures.
summation of actual expenditures. ${ }^{2}$ Chearly, the daily Treasury statement basis is better than that of warrants issned. The peeferred form, moreover, has been improved since its inception. For example, beginning July 1, 1946 the checks-paid basis of reporting was modified. and a checks-issued basis of reporting was instituted for those checks issued by the Treasmry's disbmsing system (which excludes a few agencies, notably the military). Beginning July 1 , 1948 the reporting was firther improved by having this information teletyped on the day the checks were issned. ${ }^{3}$
The 159 years break down as to sources into thare segments: 1794-1916, 1917-1947, and 1948-1952.

Sources, 1794-1916
From 1794 throngh 1916 the total expenditures in current dollars for Table B-1, Panel A, were derived from the Annual Refort of the Secretary of the Treasury for the fiscal year ended June 30 , 1950. In that document, as well as in the Anmual Report for other years, the expenditures of the federal government are given by years since 1780 . For the major components mach use was made of the Anmual Report for 1940, in which the expenditures are classified more filly; the divisions are "civil and miscellaneons," "War Department," "Navy Department," "Indians," "pensions," "postal deficiencies," and "interest on the public debt." In this first seg. ment, with adjustments explained below, "Indians" and "postal deficiencies" were inchuded with "civil and miscellaneons" to form "civil"; ${ }^{4}$ War and Navy Department expenditures were added to form "military"; "pensions" was altered to the broader title "vetcrans"; and only "interest" was not combined with some other division or changed in designation. A fifth category, "foreign." starting in 1915, was introduced from a different sonrce described

[^0]in the next section in connection with the 1917-1947 seginent. From 1794 through 1844 the data obtained from the source given above were nsed withont adjustment. But beginning with 1845 and extending throngh 1916 civil items and the few veterans items inchuded were removed from the expendit!res of the War and Navy Deparments. ${ }^{5}$ Correspondingly, the expenditures of the other departments were also examined for the removal of any

5The separation was effected on the basis of a classification of the expenditures of the War Department into military and civil functions. 'The dassification followes was as far as possible that in the Combinet Stetement of the Receipts, Expenditures and Balances of the United States Gouernment for the Fiscal Vear Endrd June if. 951 . Since $\operatorname{soc}$ classification of military and nommitary activities was fond for the Nav; Department, that for the War Department was used.

A fundamental difficulty in following ans ruie for the separation of military and civil expenditures was the frequence with which the items or their grouping changed. Sone of these differences were incoitable in a long historical serics. Many of the items for which the govermment spent moner were different a 1900 from those in 1951 , in 1875 from 1900 , and in 1815 from 1875. And the problem was complicated furthe: by clanges in ideas of reporting. For these reasons the dassification in the Combined Statement for 1951 proved to be a less and less useful guide as the years receded. Then earlier classifications. where available were followed, or judgment was used. An example of the latter is fonnd in the treatment of the expenditure for "providing for the comfort of sick and discharged soldiers." The amonnt shortly after the Givil W:ar was nearly $\$ 1$ million ammatls. Sitace it was thought that those "comforted" were soleliers cither discharged or abont to be. this iten was called nommilitary and added to veterans. Anong the principal items alleal nommilitary and therefore de ducted from the War Departinent total were espenditures for rivers and harbors: roads, bridges, and survess (except within fots and military teservations): explora tions: the Panama Canal other than for fortifations; the paeservation of histonalal fortifications; national monnments: national cometeries: Civil war records: increasing the water supply of Washington, D.C.; tite dome of the Capitol; the construction of barges and towbogts on the Mississippi River: the refunding of customs revenue collected from Pueto Rico; the raising of the "Maine": and the relief of sufferers from famine and disaster. Fxpenditures for the Office of the Chief lingincer. Burean of Topographical Figineers. and Record and lension Office were bordertine items classified as "military."

Clains, reliefs. and special parments to present and fommer members of the amed forces and to civilians were allocated somewhat arbitrarily. Claims and payments not classified as "relicfs" or "sundry pensions" were. wherever possible, dassified by function the same as any other cxpenditure. "Reliefs." and "paynents for relief" and for "sundry pensions" were desiguated as "military" if paid by the War or N:ary Department, as expenditures for veterans if in "peasions" in the Interior Department. and as "civil" if appearing anvhere else. And the satne let-alone procedure was followed for other items that for lach of information could not be allocated to functions.

Fewer nommilitary items were fomm among the expenditures of the Navy Department. Some of those deducted were for the naval home in Philadelphia, the care of lepers on Guan, the restomation of the frigate "Constitution," the Navy pension fund,
(Continued on page 66)
military or veterans items. ${ }^{*}$ Thereby a more accurate summary of expenditures was obtained. not only for military purposes, but also for veterans and for civil functions.

Sources, 1917-1947
Beginning in 1917 for "military," "veterans," and "interest," and in 1915 for the new item, "Foreign," the Anninal Report of the Secretary of the Treasury was no longer used as a source for these items, and a table of expenditures given in the Congressional Rec. ord ${ }^{7}$ was substituted. The reason for adopting the new source was to take advantage of its functional classification as already
the naval records of the Civil and Revolntionary Wars, and the grading of Cuisersity Square in Washington, D.C.
It is not contended that a complete separation between military and nommilitary items was effected. Indeed, no two persons would agree on the proper disposition of every item. It is cleat doubtful whether any one person conld, over the period of seventy years included, treat these data on expenditures with complete consistenes. The relevant decuments, however, were consulted in such detail as seemed reasonable.
The Anmul Repert of the Secretary of the Treasmy was cxamined each year from 1845 through 1916. The other reports and the vears in which consulted, where definite, follow:

Ofice of the Kegister of the Treasury, Statement of Reccipts and Expenditures of the Government (by Warrants) from July t, 1855 to Jtime 30, ISA5; and Statement of Primeipal of Public Debt from: 179 t to 1836, by Issmes und Redemptions, and from Jumuary 1, 1836, to Jene 30 , 1885 by Warrants, H.R. Doc. 11fi, Ser. 2388 in Congressional set, 49 th Cong., lst sess., 1885. This volume was nsed, as needed, to recturile An Accomnt of the Rereipts and Expenditures with the Annnal Report of the Secretary of the Treasury.

Analytical and Topical Index to the Reports of the Chief of Enginecrs and Officers of the Corts of Engincers, United Stat's Army, 1866-1900. H.R. Doc. 489, Scrs. 4532. 4533, 4534 in Congressional set, 57 th Cong., 2 dt sess., 1903 . Vols. I-3. These documents were need to determine whether douhtul items were to be included with rivers aid harbors or with forts and fortufications.
Treasury Department. Letter from the Sceretary Transmitting Estimates of Approfriations. Sonetimes the estimates contained material that helped to determine whether nincertain items should be classified as military or nommilitary.
${ }^{6}$ Among the itens of this character were the settements of the clains of Maine and Massachasetts for interest on war expenses. the payment for horses and other propetts. lost in the militans service of the United states, the expenses incurred by the pro visional government of Oregon in defending the peopte of that territory against the Caynse Indians, and the purchase of a medal for General Grant.
7 80th Cong., $2 d$ sess., Mar. 11, 1948, Vol. 94, Part 2, 1. 2576 . One of the components in this tabulation is "international affairs and finance," but "foreign" seems to be a simpler and equally descriptive designation.
worked out, and thereby to present a more accurate account of the principal purposes for which the federal government spends money.

But before the figures in the Congressional Record were used, they were revised in two respects: First, the expenditures were reallocated somewhat among the groups to correspond with the 1950-1954 Budget of the United States Government. Second, the expenditures were placed as nearly as possible on a cash basis.

In line with these changes, refunds, certain transfers of capital between wiolly owned government corporations and the Treasury, and the purchase and redemption of federal securities by wholly owned govermuent corporations were excluded from the partictilar categorics of expenditure in which they fell and also from the total.

Expenditures for foreign purposes, veterans, and interest are distinguishabte from one another and from military and civil expenditures. Although military as well as economic assistance is given to certain foreign countries, the military component causes no difficulty. Such aid, because it is received by another govern-

[^1]ment, is differentiated from United States military expenditures.
The line between "military" and the residnal "civii" ${ }^{8}$ is less Clear. The War and Nasy Depantments spend for both military and civil purposes. Indeed, the process by which the costs of these [nnctions were separated for the period 18:5-1916 has just been described. The fimetional classification mondertakes to assign only military and support functions to the category of military expenditures. The items inchoded are the direction and coordination of defense; air force, army, and naval defense; and activities supporting defense. This results in the exchusion of the Corps of fingineers, the Maritime Commission, and civilian functions generally. Civilian cmployees serving military or snpport functions are, however, inchuded, and, consequently iheir salaries are in the military expenditures reported.

The development and control of atomic energy aised a problem. The production of fissionable materials and the development and stockpiling of atomic weapons clearly serve military purposes. On the other hand, atomic energy is a form of power that in the funtre may be of great importance to the economy. In the functional classification of all post-Sccond World War budgets throngh 1954, the development and control of atomic energy is placed under "natural resources." This usage is followed here. But if the reader believes that atomic energy should be incheded under "military," he can subtract ihe atomic energy expenditures in the tabnlation below from "civil" in Table B-l, Pancl A, and add them to "military."

s. As stated catier, "divil" is obtainet threnghout by subtracting the sum of "mils.

The second of the two revisions of the table in the Congressional
 from 1921 thongh 1947 on a cash basis, with a consecuecme alteration of total expenditures.

Expenditures for veterans were adjnsted from 1921 throngh 1947 by the excess of the serviecs and bencfits received from the insmance trust funds and the net redemption of bomus bonds, over the smin of transfers fromgencral and spectal finds and the interest on federal securitics held by these fimds. ${ }^{9}$ lirom interest payments, 1921 through $1938,{ }^{10}$ certain budget expenditures were eliminatedfirst, the interest on federal securitics held in trust funds or by government agencies, and, second, the interest accruing on savings bonds, Treasny notes, and other securitics. Cash ontlays of interest actually made for amoments that had previonsly accrucil were then added to the remainder to obtain the cash payment for interest. Throngh 1938 the total of federal secmitics owned by government agencies ${ }^{1 i}$ was multiplied by the average rate of interest on the public debt, and the product was then dedncted from the functional or budget item for interest. Begiming with 1939 the functional figure was no longer used, and from that date throngh 1944 the cash outlay each year for interest was computed from monthly data in the Treasury Bulletin. Thereafter, the ammal cash payment was obtained directly from the Budget.

The final step was to adjust the total expenditures for 1921
tary," "vetelats," "intecos." and (from 1915 on) "forcign" from total expenditures. For 1916-1992 this involves a diserpanes, becanse the data for the four clases are on a diffeche repoting basis from the total. The total has beco adjusted to the daily Treasmy statement, but the clase, have not. "Civil" ontains the resulting differcuces.
The data on vetems' temefis were obnaned from the Budgel and the Annal Report of the Secretary of the Treasury, particalat! that for 1941, pp. 470-473.
The amount of federal secentioss in the variens veterans tast funds and the rate of interest were obtanad from the $A n$ natal Report of the Secretary of the Treasury. The pavments were eathated excep where giver and consistent with ihe infomation on the investume porfolies.
10 Before 1929 the anomut was insignificme
11 The figutes desired were obtained cither from the Combined Statement of Reecipis, Ixpenditure and Fitances of the United States Covernment or from the Annual Report of the Scotaty of the Treasury. The Annal Refort for 1911, p. 35, was particularly useful. Ouly federal farm loan bouds were exchuded from the total sought. The intecest on the bends, paid be the land banks, was apposimately offset by the interest receivelifon the famers who latd obtained lows.
throngh 1928 to correspond with the changes made in the compontents. Since the interest on secnities held by trust fimeds or other federal agencies had been dedncted from "interest," it followed that the aggregate of expenditures shonld be reduced accordingly. It was also necessary to add or subtract the excess, positive or negative, of veterans' services and benefits financed by trust funds over transfers to such accommts from the aggregate, and to give the same treatment to the excess of benefits from the Civil Scrvice Retivement Fund.
For the period in which they were made, these alterations did not convert the aggregate of expenditures to a cash fignre, but they moved it nearer that basis, to give a trmer picture of what the govermment actually spent.

From 1929 on it was no longer necessary to make adjustments in the total. Begiming with that year and continuing down to the present the sum of the cash payments to the public was nsed as the total of federal expenditures. ${ }^{i 2}$ Under this concept the payments inchided are from trust fimeds as well as from the Treasury. Intragovernmental transfers, whether between the Treasmry and the funds or within the funds themselves, and all noncash items, such as the accrued interest on war savings bonds, are eliminated.
At this point it seems worthwhile to explain how the transactions of government corporations and agencies are treated in the compntation of cash payments to the public. Government enterprises are of two kinds, wholly owned and quasi-govermmental. The net expenditures of wholly owned government corporations, together with those of the Post Office Department, that is, the gross disbursements of these agencies less receipts: are included as cash payments to the public-after adjustment for certain noncash and intragovernmental transactions. The net figure, which is usually obtained from the Treasmer of the United States, does not, however, inchade the effect of the relatively minor transactions of funds held in private banks. (Exceptions are certain transactions of the Fedcral Intermediate Credit Banks carried on with funds in private pp. 65-675; and for 1948 through 1959, from of the Sicretary of the Treasury, 1950,
banks, and certain debenture transactions of the Federal Honsing Arministration tikewise carvied on with private banks. The net expenditures of hoth agencies arising from the dealings mentioned are incheded as cash payments to the public.)

The treatment of a few wholly owned govermment lending enterprises, such as the Rural Electrification Administration and the Farmers Home Administration, is different. The loans and other cash expenclitures of these institntions are included in cash payments to the public, and the repayments of loans and other collections are included in cash receipts from the public.

Quasi-governmental enterprises, theugh of a public character, are no longer owned by the government or are owned only in part. The institutions now included are the Federal Home Loan Banks, the Federal Land Banks, the Federal Deposit Insnrance Corporation, and the Banks for Cooperatives. The only transactions of these agencies that enter into the computation of cash payments to the public are those that clear through the Treasury.

To arrive at a cash figure the adjustment items are added to the change (i.e. decrease) in the balance of the deposit funds that partially owned government corporations have with the Treasurer of the United States. This change in the balance represents withdrawals less deposits, that is, the net expenditures of the enterprise from its deposit-fund account with the Treasurer. To determine the net payments to the public, adjustments are made as follows:

1. Elimination of withdrawals, if any, that are payments to some other federal government fund or agency; that is, net expenditures of the deposif fund are reduced by the amount of such intragovernmental transactions.
2. Addition of deposits, if any, that are receipts from some other federal government fund or agency. For example, if the deposit fund shows net ex. penditures of $\$ X$ million, this amount having been calculated by including a deposit of, say, $\$ A$ million from the Treasury for interest on United States securities, the net payments to the public would actually have been SX plus $\$ A$ million-this having been reduced (on the books) to $\$ X$ million by the intragovernmental transaction only.
3. Subtraction of net investments (or addition of net redemptions) in United States securities. This item is subtracted because it represents liquid assets other than cash that have been purchased with (it is assumed) incone the agency has received from its operations with the public. In other words. if
these purchases were not made, it is assumed that the balance in the depositfand atcomm would have biven (ies. the net expenditures therefrom would have been rednced) by the same amount.
4. Addition of sales of agency obligations in the marke (or subtraction of redemptions of such obligations). This addition is made on the reasomable assmmption that agency obligations are issned to obtain funds that will be paid (or lent) to the public, and thens they represent payments to the public. (Conversely, redemptions are made possible by income that it is assmmed the agency has received from its regnlar transactions with the public.)
In practice, the change in the deposit-fund balances of partially owned corporations is usnally negligible over a fiscal year. Deposits are generally made (and are then withdrawn) to purchase United States secmities or to redeem agency obligations. Withdravals are made by the agency rather promptly after the proceeds from the sale of securities have been deposited in the deposit-fund acconnt. For example, in 1953 the net deposit.find expenditures of the Federal Home Loan Banks were too small to round to $\$ 1$ million. Hence, in calculating the cash payments of that agency to the public in millions of dollars, the net deposit-fund expenditures can be ignored. The computation then is as follows:

Net expenditures ( + ) (for operations) from funds obtained by redeeming U.S. securitics, or net reccipts ( - ) (from operations) which are invested in U.S. securities
Phis: Interest received from Treasury on U.S. securities and spent for operations a securics and spent for operations a
Phas: Net expenditures ( + ) (for operations) from funds obtained by selling obligations in the market, or net receipts ( - ) (from operations) used to redecon in the market outstanding obligations
Equals: Cash payments to the public (net) $\quad \frac{-12}{-\$ 65}$
"These same amounts are deducted from the Treasury's budget expenditures for interest. The net effect of the addition here and the dednction from the Treasury is
that this particnlar tranation excluded as an interest expenditure, since the later is anent by the enterprise but action.

The net cash payments to the public of $-\$ 65$ million ${ }^{13}$ represent the excess of receipts from the public over payments, it being
assumed that the investment in United States secmrities and the repayment of thei excess of receipts over disbursements in the cash accounts of the Federal Home I oan Banks with the public.

Sources, 1948-1952
From 1948 throngh 1952 the cash expenditures for military purposes, veterans, interest, and foreign affairs were obtained directly from the anmal Budget. Civil expenditures, as formerly, were the residnal when the smu of the above-mentioned items was subtracted from the total.

The figures are most accurate during the brief interval from 1948 through 1952. They are less accurate for the period from 1947 back to 1939, still less so for that extending from 1938 to 1929 , and they continue to decline in accuracy throngh the successive intervals 1928-1921, 1920-1917, 1916-1845, and, finally, 18441794. But despite any defects remaining after the adjustments that have been described, it is hoped that the figures in Table B-I, Panel A, give a better account of the expenditures of the federal government for most of the life of the nation and, during the latter part, of the cash outgo, than the historical tabulations of the Treasury, which were not designed to serve the purposes underlying this stndy, and which in earlicr years have not been adjusted by later accounting and reporting changes.

Vol. 11, pp. 569-571. 626. Regular Aumy only. Anthorized streugth, 1794-18il: actual. 1816 ont. Copied direct, 1794-1811, 1856-1858, 1868-1897; interpolated, 1816. 1859; iwo-year moving averye, 1817-1845, 1819-1855, 1860.
1812: American State l'afers, Class V', Military Affairs. U.S. Congress. 1832. Vol. I. p. 320. Agrees with Fmory Upton. The Military Poliry of the United States, Govennmeni Printing Office, 1912. p. 95. Actmal June strength of regular Ame.
1813-1815: Regulats. 1813, H. Doc. 78, 13th Cong, 2d sess., 1914, p. 3; 1814, American State Patocrs, Class I', Military Affairs. Vol. I. p. 585, after subtracting sea fencibles and rangers; 1815, Heitman. of). cill, Vol. Il, p. 626 (anthorized strength).
Volanteers and militia: For lack of other lignres, the ammal aver:ges obtaned for Table B-3 were nsed.
1846-1847: Regulars interpolated from: May 1846. Heitman, op. cit., Vol. II. p. 282; December 1846, Anmual Ficfert of the War Department. S. Doc. 1, 29th Cong., 2d sess., 1846, p. 63-agrees with Ileitman. op. cit. Vol. 1I, p. 690; Sovember 1847, Anmual Report of the War Defartment, S. Doc. 1, 30th Cong., 1st sess.. 1847, p. 75disagrees slightly with Heitman, of. cil., Vol. II, p. 6.26.
Volniteers and militia interpolated from: Sciptember 1846. Annual Report of the Whar Department, 1846, p. 64: Neccmber 1846. ibid., p. 63; November 1847, Anuwal fefort of the Whar Dcpariment, 1847, p. 75.
1848: Anntal' Report of the War Department, 1848, H.R. Doc. 1, 30th Cong., 2d sess., pp. 160, 184-f, 184-g.
1861-1867, 1898-1920: Frou fighires supplied by the Adjutant General. Copied direct, 1861, 1898-1920: interpolated. 1862-1867. 1861 ayrees with Heitman, op. cit., Vol. II. p. 626. 1860 dis:grees vith Ammal Report of the War Department, H.R. Doc. 1, 39th Cong., $2 d$ sess., 1866. Appendix p. 1. 1898-1920 include civilian components on active duty, field clerks, mirses; exchude contact surgeons and cadets.
Navy
1794-1897, 1899-1915: Fron "Total Nary Strengtit (Excludes Marite Corps and Const Guard)," mimeographed. Burean of Naval Persomel. Excludes militia, and is thought to inchade ipprentices. Prior to 1900 inchudes retised officers but excludes an moknown mumber of temporaty officers. Fate dates prior to 1900 are not kinown; starting with 1900 , date is June 30.
1898: Computed from Anaual Report of the Nazy Defartment, H.R. Doc. 3, 55th Cong., 3d sess., 1898 , pp. 30, 59, and Anmual Report of the Navy Department, H.R. Doc. 618, 65 th Cong., $2 d$ sess., 1917, p. 82 . Inchides apprentices, militia in federal service, and temporary officers.
1916-1920: Statistical Abstract of the United States, 1949. Navy strength from 1916 on includes all active duty personnel.
(Continued on page 92)

Marine-Corps
1794-1800: Extrapolated using 1800 ratio of Marinc Corps to Navy.
1800, i810, 1820, 1830, 1840, 1846-1850, 1861-i806, 1870, 1880, 1890, 1899-1900: The Amy Almanac, p. 18t. 'There is reason to helicve that The Army Almamac's official fignes of 449 for 1810 and 571 for 1820 are too low. Metcalf gives 746 for 1807,937 for 1809 , and about 1,000 for 1812 through April 1814 (C. H. Metcalf, A Histoy of the United States Marine Corps, lintuam, 1939, pp. 47-48. 53).
1803-1817: Ibid., pp. 37, 81.
1844-1845. 1859-1860, 1874-1875, 1884-1885, 1894-1895, 1901-1905: Supplied hy the Marine Corps. Agrees with The Amm; Almanac for 1860 , the only year comnon to both someces.
All other years, 1801-1893: Interpolated on the assumption that the ratio of Marine Comps to Navy strength moved in a straight line. This assumption may not be valid for 1803-1810.
1896-1897, 1899-1902: From workshects underlying The Trend of Government Artivity in the United States since i900, by Solomon Falnicant, National Buean of Econotnic Rescarch, 1952, Appendix Tahle B.5.
1898: Amutual Report of the Nary Defartment, 1917, p. 82.
1903-1920: Statistical Abstract for 1923-1925, 1931-1992, and 1918-1949.

## Const Guard

1846-1848, 1861-1865, 1898-1899: The Army Almanac, p. 185. In the First and Secomd Workd Wars the Coast Guard was part of the Navy.

## Total Servicemen

1921-1950: Statistical Abstratt for 1950 and 1951.

## Mate Population 20-39 Yfars Old

1790: White males ovet 16 fiom Historical Statistics of the United States, 1789-1945, 1949, p. 28. were multiplied by the 1800 ratio of white males $16-44$ to white males over 16. calculated from State Departnent. Compendium . . . from the Refurns of the Sixth Census. Thomas Allen, 1841. p. 370, and the product in turn by the 1870 ratio of white males $20-39$ to white males $16-44$, estimated from Ninth Census of the United States. 1870. Vol. II, Vital Statistics, p. 55.3, and Tenth Census of the United States, 1880, Vol. I. Poptilation, p. 548.
1800, 1810, 1820: White males $16-44$ from Compendium . . . from the Returms of the Sixth Censtis, pp. 370-372, were nultiplied by the 1870 ratio of white males $20-39$ to white males $16-44$, above.
1830, 1840: Compendium . . from the Returns of the Sixth Census, pp. 100-101, 374-375.
1850: Stventh Census of the United Stales, 1850, p. slii.
1860: White males 20-39 in whole United States, Fighth Census of the Vnited States. 1860, Popuiation, yp. 592-597.
White males 20-39 ontside the Confederate States were ohtained by sulbtracting from white males 20-39 in whole United States, from Ninth Census of the United States. 1870, Vol. I, Population, p. 4. the 1860 white male population $20-39$ years old of the sulsequent Confederate States of Anerica. excluding West Virginia. from Ninth Census of the Unitrd States, 1970 , Vol I, Popmlation, pp. 71-72. and Vol. II. Vitel Statistics, p. 690. and Eighth Census of the United States, 1860, Pofnlation, pp. 500 '514. 'Total males 20-39 in whole United States, Fifteenth Census of the United States. 1930. Vol. II, Populationt. p. 576.

1870: White males 20-39 in whole United States, Sixteenth Census of the United States, 19f0. Vol. II, Population, Part 1, p. 28, multiplied by a factor calculated from

Fleventh Census of the United States, 1590, Population, Past 1, p. xii, to allow for underenumeration.
White males 20-39 outside the Confederate States, similarly to 1800 . Confedente States of America, excluding West Virginia, were obtained here from Ninth Census of the United States, 1870, Vol. II, Vital Statistics, pp. 612-613, and multiplied by a factor calculated from Elczenth Census of the United States, 1890, Pofntation. P'at I. p. xii, and Ninth Census, 1870 , Vol. 1, Jopulation, p. 4, 10 allow for underemmetation.
Total mates $20-39$ in whole United States, same as white males $20-39$ in whote United States.
1880, 1890, 1900, 1910. 1920, 1930, 1940: Sixteenth Census of the United States, 1910, Vol. II, Population, l'art I, p. 27. Continental United States.
1950: 1950 Census of Population, Preliminary lieports, Scries PC-7, No. 1, p. 6. Continental United States. Provisional estimate.
All other years, 1791-1949, by straight-line interpolation between census dates.

## Notes to Tabie B. 3

 18.53 consists of the six months jamainy througin June 1843 .
b From 1794-181I, :uthonized strength only. Inchudes Ait Fonce.
c Inclades Marine Corps helindes Coast Cuand and predecessors for same period as does Table ls-2.
Note: Expenditure for the six-monily "year" 1843 was donbled to get an annal rate. Source:

## Colum! 1

1794-1815, 1816-1845, 1s49-1860, 1860-1897: lrom F. B. Heitman, Historical Register and Dictionary of the L'nited States Army from Its Organization, September 29, 17s9, to Manch 2, 1903 , 1903, Vol. II, p1 $566^{2}-571,626$. Regular Army only. Authorized streugth, $1794-1811$; act!1al, 1816 on. Copied direct, 1794-1795, 1797, 1801, 1803-1807. 1809-1811; aveaged, 1796, 1798-1800, 1802, 1808, 1816, 1843, 1849, 1859; two-ve:11 moving average, 1817-18.12, 1857-1858, 1866-1897; copied figure given for preceding

1812-ISI5: Regulars, averaged from figures used to obtain Table B-2 for these years plus dat: from limony Ip:on. The Military loblicy of the Enited States, Govemment ['rinting Office, 1919, ip). 105, 120, 133, 136 (last 3 references agree wilh Heitman. op. cil., Vol. II, p. 2SI): and from II.R. I)oc. 78 , I3th Cong., 2 d sess., I814, p. 3 (to obtain December 1813).
Volunteces and militia: Annual averages were computed from months and days of service given in American Siate Papers, Class V', Military Affairs, 1839, Vol. VI, Pp. 928-960.
1846-1848: Regulars, averaged from figures used to obtain Table B-2, plus December 1848 from Heitman, of cit., Vol. 1I, p. 626 (agrees with dmutual Report of the War Department, 1846, p. 64).
Volmuters and militia. ateraged from figures used to ohtain Table B-2.
1861-186:: Averaged from Heitman: op. cit., Vol. II, p. 696, and from figures furmished by the Adjutant General.
1899-1903: Tverages computed from dmmal Report of the War Department for these years were raised to the lesel of the figures supplicd by the Adjutant General. 1904-1916: Two sear moving average of figures furmished by the Adjutant General. i917-1922: Averaged from Statistical Abstract. 1922, 1930, and 1949. and Anmual Refort of the Wer Department, 1916-1917. 1919, and I091-1923. and then adjusted to the level of figures supplied by the Adjutant General.
1923-1939: To each calendar-year average given in Bureau of Labor Statistios release, "Personnel in the Military branch of the lederal Govemment, [914-Junc 1950," was added the cxcess for that year of the figure appearing in the 1951 statistieal Abstract over that appearing in the Statistical Abstract for the fear in question. Atwo-vear moving arerage was taken of the result.
1910-1950: Aserages of the monthly figures appearing in the BIS release, of cit. A July 1950 !gure equal to June was assumed.

## Columin 2

179.4-1845, 1849-1860. I866-1893. 1900-1916. 1921-1993. From sum of Navy and Marine Corps figures used for Table B-2. Copied direct, 1794-1842; averaged, 1843 ; two-jear mosing averige, 1844-1845, 1849-1860, 1866-1897, 1900-1916, and 1921-1939. 1846-1848, 186I-1865. 1898-1899: Same as preceding period, except that Coast Guard diata, from The Army Almanac, p. I85, have been added for the periods indicated, and that in 1898-I 899 additional Nay and Marine Corps figures have been secured
from the Anmual Refort of the Navy Department, 1898. pp. 30, 59, 143, and 837; 1917, p. 82.
1917-1920: Averages computed fiom Statistical Abstrack for 1919-!921 were uased to
 1934-1938: The June 30 Coast Guard stragth from the Annual Report of the Secre tary of the Treasury for 1933-1938 was subtracted from the BLS calemdar-year average of Navy, Manime Corps, and Coast Guard, and a wo bear moving welage was taten of the result.

For 1934, the 13LS figure for 1933 was finst conceted by adding to it the excess of the Junc 30 figure appearing in the 1951 Statistical Abstract over that appearing in the 1933 issue.
1939-19.50: Averaged from BIS montily data. Coast Cuatd data were inchuded Nov. 1, 1941 to Dec. 31, 1945.

## Column 3

Columı1 + column 2.

## Colamms 4 and 5

1794-1844: The expenditures of the Depatmenis of the Aray and Navy from the 1950 Anmual Report of the Secretary of the Trasury were deflated by the index of wholesale prices of all commodities that was used to get Table B-1, Panel B, and then divided by columns 1 and 2 of the present table.
1845-1916: Same as 1794-1844, except that the expenditures used were the Army and Navy military expenditures obtained for colum 1 of Table B-l. Panci A.
1925, 1930, 1939, 1950: The military expenditures for the Army and Navy were computed separately by the method ased for the period 184 - 1916 . The proportion that each of the wo bore to the total of both was applied to total military expenditures. 1926 prices, from Table B-1, Panc: B, and the result divided by columes 1 and 2 of the present table.

Column 6
Data in Table R-1, Panel B, colnmo l, were divided by colmonn 3 of the present table.

## How to Obtain National Bureau Publications

The National Burcau of Fconomic Rescard: is a bonprofit membership corporation organized to make inpartial studies in comonic sicme.

Its books are published and distributed (situce April 1, 19:3) by Princeton Uuiversity I'ress; its Occasional Papers and Technical leapers are published and distributed by the National Burean itsclf.

Publications may be obtaned cither on contributing subseriptions or by purchase.
A contributor of S\$5 or more a vear is catitled to wowive a complimentary copy
 Amual Repori-in alvance of ateance to the public. In aldition, at contribume is chtited to a one-thided discomen on all National baram publications phehasci.

An associate contributor of $\$ 0$ a yean wecives a complimemany copy of ead cument Occasional Papor, Technical Paper, and the. tmanal Report, and is entitled to a one third disconnt on alt publiations purhated. Only the following are eligible to become associates: teachers, students, and libarios in recognied educational institutions; members of scientific socicties on of private monpofit research agencies.

A contributor of $\$ t$ receives the next five Occasional papers (or any Technical faper issued during this period may be sulstituted) and the dmonal Report.

> Contributions to the National Burean are deductiole in calculating federal income taxes.

NONCONTRIBUTORS should order books from:

Princeton University Press<br>Princeton, New Jersey

NONCONTRIBUTOPS should order Pupers and repuest the Anmal Report from:

CONTRIBUTORS should order all books and Popers, and requent the Ammal Report from:

## NATIONAL BUREAU OF ECONOMIC RESEARCH, INC.

261 Madison Avenue

[^0]:    ${ }^{2}$ Checks not inchuded in the last days of a fiscal month or year. because of lack of time to receive or compile them, are sometimes included in a revised statement, ant those relating to the previous period are excluted. Such a report is said to be ont the "basis of daily Treasure statements revised."
    ${ }^{3}$ Effective Febmaty 17, 195 the daily Treasmy statement censed to be the basis of reporting budget results and a monthly statement (different from the new daily state. mem) now serves that purpose.
    4 Procedurally, though, "civil" throughout this stutly is the residual obtained by sub. tracting the other groups from total expenditures.

[^1]:    The expendinures for "military," under the fnnctional classification in the Comgressional Record, are identical in amome chring 1900-1909 with the smm of the expenditures of the W'ar and Navy Departments as given in the Annual Report of the Secretary of the Treasury. Beginning in 1910 a variation appeared which raised the question whether to discontinne in that year the separation of nomititary from military expenditures and to start the use of the functional dassification by wheh that differentiation is also accomplished. But a brakdown of the functional figme for severai succeding years, inchuding 1916, disclosed a difference in the treatment of the expenditures for the lanama Canal. Their cutire amonat, in the functional clas. sification, was incheded with military costs. Donbtless an argment conld be devel oped to the effect that all expenses of operating the Panama Canal shonld be charged to national defense. But the Canal also serves the interests of trade. It wonld appear. therefore, that part of the costs shonld be allocated to that use. This was done in the separation of military from nommilitary expendianes made for this study, and described in footnote 5 above.
    From 1916 on, the total of federal expendiares is on the daily Treasury statement basis. Accompanying the change in reporting were alterations in the component that do not, at least in the begiming years of the period, pernit a comparison of the functional and the series developed here, with respect to the treatment of the costs of the Panama Canal. The fumetional classification in recent years, however, cxchudes all but a minor part of the expenditures for the Panana Canal. Trne, this is not a certain indication of what was done in the carlier part of the period. But the change to finctional had to be made at some point, and 1917, the begiming of the First World War, in which the separation of military from nommilitary expendiunes raised many problems, appeared to be an appropriate year.

[^2]:    ${ }^{13}$ Sce "Reccipts from and Payments to the Public," minieographed, Executive Office of the President, Bureau of the Budget, Jamury 1954, p. 5 .
