Relation of the Directors to the Work and Publications of the National Bureau of Economic Research

1. The object of the National Bureau of Economic Research is to ascertain and to present to the public important economic facts and their interpretation in a scientific and impartial manner. The Board of Directors is charged with the responsibility of ensuring that the work of the National Bureau is carried on in strict conformity with this object.

2. The President of the National Bureau shall submit to the Board of Directors, or to its Executive Committee, for their formal adoption all specific proposals for research to be instituted.

3. No research report shall be published by the National Bureau until the President has sent each member of the Board a notice that a manuscript is recommended for publication and that in the President's opinion it is suitable for publication in accordance with the principles of the National Bureau. Such notification will include an abstract or summary of the manuscript's content and a response form for use by those Directors who desire a copy of the manuscript for review. Each manuscript shall contain a summary drawing attention to the nature and treatment of the problem studied, the character of the data and their utilization in the report, and the main conclusions reached.

4. For each manuscript so submitted, a special committee of the Directors (including Directors Emeriti) shall be appointed by majority agreement of the President and Vice Presidents (or by the Executive Committee in case of inability to decide on the part of the President and Vice Presidents), consisting of three Directors selected as nearly as may be one from each general division of the Board. The names of the special manuscript committee shall be stated to each Director when notice of the proposed publication is submitted to him. It shall be the duty of each member of the special manuscript committee to read the manuscript. If each member of the manuscript committee signifies his approval within thirty days of the transmittal of the manuscript, the report may be published. If at the end of that period any member of the manuscript committee withholds his approval, the President shall then notify each member of the Board, requesting approval or disapproval of publication, and thirty days additional shall be granted for this purpose. The manuscript shall then not be published unless at least a majority of the entire Board who shall have voted on the proposal within the time fixed for the receipt of votes shall have approved.

5. No manuscript may be published, though approved by each member of the special manuscript committee, until forty-five days have elapsed from the transmittal of the report in manuscript form. The interval is allowed for the receipt of any memorandum of dissent or reservation, together with a brief statement of his reasons, that any member may wish to express; and such memorandum of dissent or reservation shall be published with the manuscript if he so desires. Publication does not, however, imply that each member of the Board has read the manuscript, or that either members of the Board in general or the special committee have passed on its validity in every detail.

6. Publications of the National Bureau issued for informational purposes concerning the work of the Bureau and its staff, or issued to inform the public of activities of Bureau staff, and volumes issued as a result of various conferences involving the National Bureau shall contain a specific disclaimer noting that such publication has not passed through the normal review procedures required in this resolution. The Executive Committee of the Board is charged with review of all such publications from time to time to ensure that they do not take on the character of formal research reports of the National Bureau, requiring formal Board approval.

7. Unless otherwise determined by the Board or exempted by the terms of paragraph 6, a copy of this resolution shall be printed in each National Bureau publication.

(Resolution adopted October 25, 1926, as revised through September 30, 1974)

Acknowledgments

In the course of writing this book we have benefited from the generosity of numerous colleagues, granting agencies, and our families. We owe special thanks to Claudia Goldin for her comments, guidance, and encouragement while we wrote the original journal articles underlying this book and then worked to develop our ideas into a book manuscript. Gary Libecap generously shared his insights on numerous drafts of each phase of the project. We have been truly lucky to have such a great colleague with us in Arizona.

Financial support for the project was provided by the National Science Foundation Grant No. SBR-9223058, the Earhart Foundation, the University of Arizona Foundation, and the Spanish Ministry of Education and Culture. Mark Isaac in his role as department head was helpful in providing funds for travel and data entry when they were needed most.

Presenting our work in numerous forums over the eight years of working on this project helped us to clarify the issues and to understand workers' compensation better ourselves. Colleagues involved in studying the Development of the American Economy under the aegis of the National Bureau of Economic Research endured numerous presentations of various phases of the work. Each discussion helped us improve the work immensely. We have benefited from the comments of workshop participants at numerous universities, including Ben-Gurion, California–Berkeley, California–Davis, California–Los Angeles, California–Riverside, California Institute of Technology, Carlos III de Madrid, Carnegie Mellon, Chicago, Columbia, Cornell, Georgia, Harvard, Hawaii, Hebrew, Hoover Institution, Illinois, Indiana, Kansas, Kentucky, London School of Economics, Maryland, McGill, North Carolina State, Northwestern, Queens (Ontario), Stanford, and Toronto. We presented various components of the

research at a number of conferences, including meetings of the Economic History Association, the Cliometrics Conference, All-UC Economic History Conference, the American Law and Economics Association, and the Allied Social Science Associations.

Many colleagues along the way have offered important advice on data, analysis, and interpretation. John Wallis and Sumner LaCroix, who shared the travails of graduate school with Price, continue to be great friends, confidants, and professional colleagues to us both. The following people have given us specific comments that changed the way we thought about some aspect of what we have written about workers' compensation: Lee Alston, Jeremy Atack, Susan Carter, Lee Craig, Barry Eichengreen, Joseph Ferrie, Richard Epstein, Doc Ghose, Edward Glaeser, Avner Greif, Michael Haines, Robert Higgs, Lawrence Katz, J. Morgan Kousser, Jeff LaFrance, Patrick Legros, Dean Lueck, Bob Margo, Joel Mokyr, Roger Noll, Douglass North, Ron Oaxaca, Martha Olney, Sam Peltzman, Stan Reynolds, Jim Ratliff, Joshua Rosenbloom, Barbara Sands, Joseph Sicilian, William Sundstrom, Richard Sutch, Joseph Terza, Robert Topel, Tom Weiss, Paul Wilson, John Wooders, and a host of anonymous referees. All of these people helped improve the book, yet responsibility for any of its shortcomings is ours.

We collected empirical evidence for our research with the help of fine staff members at several excellent archives and libraries: the U.S. Department of Labor Library, the Wisconsin State Historical Society, the Ohio State University Library, the Ohio Historical Society, the Cincinnati Public Library, the Alabama Department of Archives and History, Missouri Historical Society, the Minnesota State Historical Society, the University of Washington Library, and Littauer and Baker Libraries at Harvard University.

We received able research assistance from Joshua Gotkin, Melissa Thomasson, Kari Beardsley, and Sule Balkan. Amanda Ebel and Jeff Taylor entered and checked tremendous amounts of data.

We would like to thank the following publishers for allowing us to reprint material from our earlier articles that have appeared in print in their journals. Small parts of chapter 2 have been reprinted from Price V. Fishback and Shawn Everett Kantor, "'Square Deal' or Raw Deal? Market Compensation for Workplace Disamenities, 1884–1903," *Journal of Economic History* 52 (December 1992): 826–48 (used with the permission of Cambridge University Press); and from Shawn Everett Kantor and Price V. Fishback, "Non-Fatal Accident Compensation Under the Negligence Liability System at the Turn of the Century," *Journal of Law, Economics, and Organization* 11 (April 1995): 406–33 (used with the permission of Oxford University Press). Small parts of chapter 3 and a significant part of appendix D were published in Price V. Fishback and Shawn Everett Kantor, "Did Workers Pay for the Passage of Workers' Compensation Laws?" *Quarterly Journal of Economics* 110 (August 1995): 713–42 (used

with the permission of MIT Press). Small parts of chapter 3 and a significant portion of appendix F appeared in Shawn Everett Kantor and Price V. Fishback, "Precautionary Saving, Insurance, and the Origins of Workers' Compensation," *Journal of Political Economy* 104 (April 1996): 419–42 (courtesy of the University of Chicago Press). Parts of chapter 4, appendix H, and appendix I appeared in Price V. Fishback and Shawn Everett Kantor, "The Adoption of Workers' Compensation in the United States, 1900–1930," *Journal of Law and Economics* 61 (October 1998): 305–42 (used with the permission of the University of Chicago Press). A small part of chapter 5 appeared in Shawn Everett Kantor and Price V. Fishback, "Coalition Formation and the Adoption of Workers' Compensation: The Case of Missouri, 1911 to 1926," in *The Regulated Economy: A Historical Approach to Political Economy*, edited by Claudia Goldin and Gary D. Libecap, 259–97 (Chicago: University of Chicago Press, 1994). Parts of chapter 5 appeared in Shawn Everett Kantor and Price V. Fishback, "How Minnesota Adopted Workers' Compensation," *Independent Review* 2 (Spring 1998): 557–78 (used with the permission of the Independent Institute). Parts of chapter 6 and appendix J are from Price V. Fishback and Shawn Everett Kantor, "The Durable Experiment: State Insurance of Workers' Compensation Risk in the Early Twentieth Century," *Journal of Economic History* 56 (December 1996): 809–36 (used with the permission of Cambridge University Press). Parts of chapter 7 and appendix K first appeared in Price V. Fishback and Shawn Everett Kantor, "The Political Economy of Workers' Compensation Benefits, 1910–1930," *Explorations in Economic History* 35 (April 1998): 109–39 (used with the permission of Academic Press).

Price owes special thanks to his family. I owe the largest debt to my wife Pam Slaten. Sharing our lives together has enriched my own life beyond measure. My sister Taylor is warm, generous, and one of the finest people I know. Better yet, she indulges my second childhood, as I play with my nieces Jamie, Erin, and Katherine. I dedicate the book to my mother Fran, who instilled in me the positive attitude that has helped me appreciate just how wonderful life can be.

Shawn's debts to his family are no less. This book is dedicated to my wife Jennifer and boys Quinn and Jake. The best part of a day of writing was coming home. Parts of the book's rewriting and editing took place during a sabbatical leave visit to Universidad Carlos III de Madrid. My friends Diego Moreno and Praveen Kujal made me feel welcome in a foreign land. The fondest memories of working on this book occurred not in an office, archives, or before a computer, but in the course of seeing Europe with 1½ and 3½ year olds. Carrying Quinn on my shoulders up a mountain in Sintra, or riding a camel through the Negev, or watching the boys play amidst the Roman Forum, those are the most precious moments.
